COURSE DESCRIPTION:

The Patient Care Technician course is a three-phase course that is based on the Health Science and Medical Technology industry sector of the California Career Technical Education Model Curriculum Standards.

PCT 101 This combined lecture/lab course teaches the student the theory and clinical skills needed to work with residents/patients in a skilled nursing facility or rehabilitation facility. It is designed to provide the student with the knowledge and skills necessary to perform basic care services for a patient in an acute care setting or a resident in a long-term care setting. Students who successfully complete the course can sit for the California State Certification as a Nurse Assistant.

PCT 102 This course provides a comprehensive review of nurse assistant skills with emphasis on acute care units, such as medical, surgical, pediatric, obstetric, orthopedic, etc. The various departments of the acute care facility within their scope of practice.

PCT 103 This combined lecture/lab course for home health teaches the student the theory and clinical skills needed to work with clients in the home care setting. Upon successful completion of this portion of the program, the instructor will submit the names of eligible students to the CDPH for the Home Health Aide (CDPH makes the final decision in all certification eligibility).

Phlebotomy subjects include vascular anatomy and physiology, preparing blood smears, medical terminology, emergency procedures, delivering a variety of clinical specimens and procedures, simulation and clinical laboratory experiences integrated with didactic portion of the program.
